DISCUSSION/RATIONALE:

The Hoffman Landfill was a former strip mine that received municipal and industrial wastes from about 1967 -1971. Previous sampling by EPA and MDE has shown some degradation of groundwater and surface water from the strip mining and landfilling activities. However, due to the lack of both groundwater and surface water targets, the site would not qualify for further remedial site assessment under CERCLA.

MDE will continue to monitor future activities/development under its own program.
